Tools for Improved Debugging

- **HD4096 Technology** - HD4096 high definition technology enables capture and display of signals up to 1 GHz with high sample rate and 16 times more resolution.
- **Mixed Signal** — Debug complex embedded designs with integrated 16 channel mixed signal capability
- **Touch Screen** — Easily configure channels, timebase, trigger and all functions with the intuitive, efficient touch screen interface
- **Q-Scape™ Multi-tab Display Architecture** — More waveforms require more display area. Q-Scape provides 4 display "tabs" and numerous ways to view the displays.
- **Long Memory** — Up to 250 Mpts/ch allows capture of long data records using slow sample rates (as low as 25 kS/s) or 5 MS/s Roll mode.
- **LabNotebook** — Save all results and data with a single button press and create custom reports with LabNotebook
- **Software Options** - 19 different serial trigger/decode options, plus many others.
