TELETRONICS TECHNOLOGY CORPORATION

MCIF-105 Datasheet

Remote CAIS Interface Module for the MCDAU/MWDAU-2000

Features

- Remote CAIS Bus port for communication with the “Master” and daisy-chain CAIS Bus output for connection to downstream remote units
- Provides CAIS Bus CMD/RPLY interface from the CAIS controller, and CAIS BUS CMD/RPLY to remotes down stream.
- Must be used with an MRCI-105 for a MCDAU remote application
- Can optionally be used with MWCI-105 or MWCI-120 for CAIS remote application.

Description

This module provides the interface with the “master” via the CAIS Bus (command and response bus) for use with the MCDAU-2000 and MWDAU-2000.

Applications

- CAIS applications
- Distributed systems
- Time-tagging data
