

## About This Guide

### Scope

This bulletin pertains to the following software release for the mA-3011 AXIe Embedded Host Module:

- Software Release: SAP# 111169, Linux OS, RHEL7 for CMP systems
- Software Version: 1.5.0-xx

### Reason for Notice

The above referenced software release updates the mA-3011 AXIe Embedded Host Module to a Linux™ Red Hat Operating System (OS).

The action(s) defined in this bulletin must be performed in order to support auto-mount capabilities of ExFAT formatted USB devices on CMP Systems that are running the RHEL7 Operating System.

### Action Required

The following must be performed in order to support auto-mount capabilities of ExFAT formatted USB devices on CMP mA-3011 AXIe Embedded Host and / or mA-3A01 AXIe Mass Storage Module:

- When formatting USB devices to ExFAT, device must be assigned a name (below example). Assigned name must comply with Windows naming conventions.

NOTE: CMP hardware will not recognize the USB device if a name is not assigned to the ExFAT formatted USB device.
